

Innovation and Sustainability

Our Vision

Colombo Design combines creativity, quality, and environmental responsibility, adopting a production model based on sustainable innovation.

Every technological choice is designed to:

- Reduce environmental impact
- Ensure operators' safety and health
- Offer durable products, able to withstand over time

Certifications and Values

Our commitment is confirmed by:

- **UNI EN ISO 14001** – Environmental management
- **UNI EN ISO 9001** – Quality management
- **EN 1906** – Product certification for handles and knobs (durability and performance)
- **GREEN MADE** – Synonym of sustainability
- **MADE IN ITALY** – Excellence in Manufacturing

Our Sustainable Choices

Powder Coating

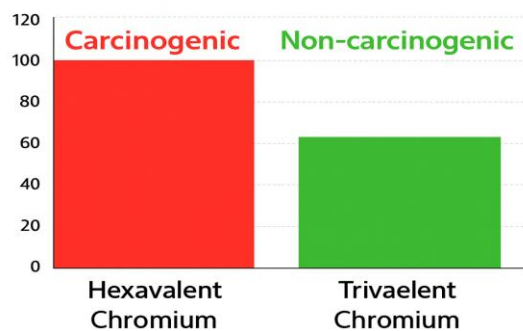

For over 20 years, Colombo Design has been using powder coatings without harmful solvents, safe for the environment and for people.

Trivalent Chrome

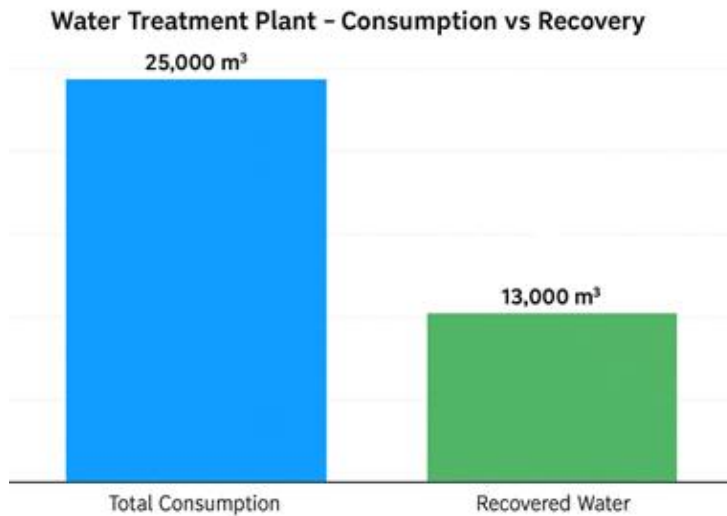

Voluntary transition from hexavalent chromium to trivalent chromium: non-carcinogenic and compliant with international standards.

Transition from Cr⁶⁺ to Cr³⁺ – Investment € 0.5 M

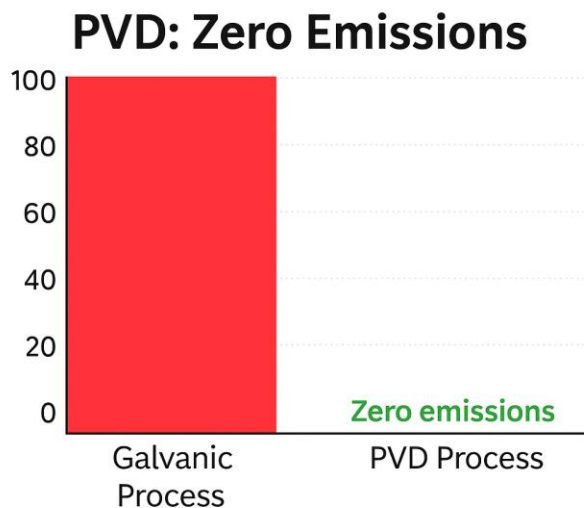

Water Treatment

New installation capable of recovering up to 40% of annual needs. Significant reduction in the volumes of treated wastewater discharged into the public network and a marked decrease in the production of hazardous waste.

PVD Finishes

Zero-emission technology, more efficient and offering superior aesthetic performance.

Durable Products

Tested for up to 200,000 use cycles, fighting against the "throwaway" culture.

A Look to the Future

By 2026 Colombo Design will obtain the **EPD (Environmental Product Declaration)** certification, to transparently measure the environmental impact throughout the entire product life cycle.
